Summary

Full-stack web developer with experience in HTML, CSS, JavaScript, React, Node.js, SQL, and Git. Proven track record of creating high-quality websites and applications for clients and employers in various industries.

Skills

HTML, CSS, JavaScript, React, Node.js, SQL, Git

Experience

Front End Developer - Weverdat (July 2021 - June 2023)

- Created a series of widgets to display live cricket scoring information using React and websockets.
- Created IntelligentCricket.com, a static website dedicated to cricket data and analysis with integrated Tableau reports.
- Created DecimalDataServices.com, a static company website advertising our sports betting products.

Full Stack Web Developer - DataCapture (October 2020 - July 2021)

- Collaborated with senior developers to make UI/UX design decisions for OPTiMiSe, a web-based community transport booking software.
- Implemented features and fixed bugs across the stack using React, Node.js, and SQL.
- Created a demo UI for a client project pitch that received strong positive feedback.
- Provided technical support to customers via email.

Professional Esports Player & Content Creator (2017 - 2020)

- Ranked #1 on the European leaderboards multiple times in PlayerUnknown's Battlegrounds (PUBG).
- Signed with North American esports organisation Digital Chaos and competed at IEM Oakland 2017 (peak viewership 90,000).
- Built an online audience by creating content on Twitch.tv.

Freelance Web Developer (2016 - 2017)

- Worked with WordPress to create and modify websites for online clients through the freelancing platform Fiverr.
- Maintained a perfect 5-star rating and received positive feedback from clients.

Education

- Studied Computer Science at Bangor University.
- Triple Distinction, BTEC Extended Diploma in Information Technology at East Riding College, Bridlington.
- Achieved A, B, and C in English, Maths and Psychology GCSEs respectively.
